

eufy S380 HomeBase (HomeBase 3) is the heart and soul of the eufy Security ecosystem. More than just a hub or internet bridge, HomeBase 3 offers expandable local storage, enhanced AI functionality, cross-device features, and more, all with no monthly fees.

Getting so much out of HomeBase 3 has been an intense and exciting challenge, and we are excited to be in the home stretch of allowing full functionality with as many eufy Security devices as possible.

Below is a list of products that have full, partial, or planned HomeBase 3 compatibility, as well as when compatibility can be expected for devices without it.

Finding the Part Number: The Part Number (PN) of any eufy Security device can be located on the product or within the eufy Security app. (Device Settings > General > About Device > The first five characters of the Serial Number)

Type	Product Name	Product Number	HomeBase 3 Storage Compatibility	HomeBase 3 BionicMind™ /Modes/Automation Compatibility
